TRULY SECURE

Nothing stays on the device.

Messages, contacts and files are always fetched from the server. **After logout, nothing remains on the phone** – no messages, no contacts, no files.

- **End-to-end encrypted** throughout – voice, video, messages, files, positions
- Video conferencing **without mixing streams on the server** – content is never exposed
- Phone books and permissions managed centrally – per user, group and platform

YOUR SILENTEL GOLD PARTNER

Secure with ICSL – since 2001

Telecommunications from the ground up since **1995**, specialized in secure communications since **2001**. Our experience: one size does not fit all – which is why we tailor solutions, devices and classification levels to each requirement.

- **Silentel Gold Partner** – one of two worldwide, alongside Motorola
- **Facility Security Clearance (FCL)** up to GEHEIM / SECRET UE / NATO SECRET
- Consulting, integration, training and **customization** from a single source
- Operation **as a service**, hosted or **on-premise** in your infrastructure

When secure has to mean secure.

Highly secure command communications for ministries, general staff, intelligence services and special forces.

Silentel®

SILENTEL TODAY

What you may not yet know about Silentel

- **Secure Maps** – shared operational picture in real time
- **Drone livestream** directly in the messenger
- **Real-time push-to-talk** with Bluetooth button and headset
- **Video conferencing** and screen sharing, end-to-end encrypted
- **Silentel Studio** – simple administration with inline help, also on mobile
- **Post-quantum cryptography** – already fully integrated
- **PBX integration**

NEW **SecureSpace** – laptop with isolated workspaces for classified and regular use.

ICSL® is a registered trademark of ICSL, Austria. Silentel® is a registered trademark of Ardaco a.s., Slovakia. As of November 2026.

Nothing on the device.
In the NATO catalog.
Made in the EU.

WHO IT IS FOR

Not for everyone. For those for whom it truly matters.

Ministerial level · **General staff** · **Special forces** · **Intelligence services** · **Missions abroad** · **Defense diplomacy**

Silentel is designed for those levels of command whose communications must never fall into the wrong hands – in the ministry, in the staff and on missions abroad.

Approved. Verified. Unbroken.

- Listed in the **NATO product catalog**
- Certified by **national security authorities** since 2006
- **Over 20 years** without a vulnerability and without a security incident
- Concept, design and implementation repeatedly audited – **developed in the EU**

Implementations possible for:

RESTRICTED · **CONFIDENTIAL** · **SECRET**

With ICSL, also with the right device – from COTS to proprietary / custom-made.

Cryptography beyond TOP SECRET level

ALGORITHM	TOP SECRET[1]	SILENTEL
AES	256 bit	**256 bit**
ECDH	P-384	**P-521**
ECDSA	P-384	**P-521**
SHA	SHA-384	**SHA-512**

+ Post-quantum cryptography fully integrated

[1] Parameters approved by the NSA for protecting National Security Systems.

IN OPERATION

Real-time push-to-talk

- Group communication **like radio** – in real time
- **Full duplex** for critical situations
- **Bluetooth headsets** and external PTT buttons
- Reliable even at **low bandwidth** – over mobile networks, Wi-Fi and satellite
- Can be combined with Secure Maps and **Sniper View**

Secure Maps – live tactical picture NEW

Developed with special units – equally suited to special forces, snipers, reconnaissance and close protection.

- **Live positions** of all forces, color-coded roles and teams, dedicated **Sniper Views**
- Draw zones, routes, buildings and sectors **directly on the map** – instantly visible to all
- **Command view** for commander and command post on a PC
- Voice, chat and tactical picture **in the same group**
- Positions shared only during operations, **no movement history**

Secure Maps is already in service with:
Counter-terrorism intervention unit · mobile intervention unit of the border police · covert surveillance and technical operations · protection of constitutional officials and diplomatic missions

FROM THE AIR

Drone livestream in the secure messenger NEW

- Drone feed as **video transmission in the group**
- Smartphone, tablet and **command post**
- Video, telemetry and voice in one interface
- Encrypted throughout – **no third-party apps**

Every form of communication. Every platform.

Voice · **Video** · **Conference** · **Messaging** · **Push-to-talk** · **Maps** · **Files** · **Drone video**

- **iOS, Android, Windows, Mac** – one account across multiple devices
- From off-the-shelf devices to **proprietary hardware**
- **Silentel Studio:** users and groups in a few clicks, inline help for every setting
- Integration with your **PBX**, Silentel **VPN** and **SecureSpace** for separate work environments on a laptop
